*Dispositivo di misurazione elettrica remoto per impianti fotovoltaici in reti MRH™.*

*Remote electrical measuring device for photovoltaic systems within MRH™ networks.*

**MRH™**

NanoVIP® DS™ è un potente analizzatore di qualità dell'energia remoto per la misura di singoli pannelli o stringhe fotovoltaici.

Rileva tutte le grandezze necessarie alla misura e verifica di un impianto fotovoltaico (Temperature pannello e ambiente, irraggiamento, velocità del vento e parametri elettrici), inviandoli in tempo reale a un dispositivo master NANOVIP® QUADRA™.

**EN** NanoVIP® DS™ is a powerful remote power quality analyzer for measuring individual panels or photovoltaic strings. It detects all the necessary parameters for the measurement and verification of a photovoltaic system (panel and environment temperatures, irradiation, wind speed and electrical parameters), sending them in real time to a NANOVIP® QUADRA™ master device.
